Application/Control Number: 09/754,998

Art Unit: 1642

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: an antibody that binds p185HER2

Species B: an antibody that binds CD18

The species are distinct because each antibody binds an antigen that is patentably distinct and distinct in both structure and function and an antibody that binds CD18 would not necessarily bind p185HER2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 19-27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
